## Regarding claim 1:

The claim language "a protection member capable of being placed between the light source and the recording medium when the media error is detected;

wherein the protection member is further placed between the recording head and the recording medium" (lines 14-17 of the claim) has been changed to "a protection member is placed between the light source and the recording medium and the protection member is further placed between the recording head and the recording medium when the media error is detected."

## Allowable Subject Matter

Claims 1-4 and 6-13 are allowed.

Claims 1-4, 6-7, and 11-13 are allowable since the prior art of record does not teach an inkjet printer comprising a protection member that is placed between the light source and the recording medium and the protection member is further placed between the recording head and the recording medium when the media error is detected. It is this limitation, in

combination with other features and limitations of claim 1, which makes these claims allowable over the prior art of record.
